WHO WE ARE

Quality and Service Stands Priority For Us..!

We are proud to introduce our premium Majestic Movable Wall Systems, featuring Noise Reduction Acoustic Movable Wall Panels and Premium Glass Movable Wall Options. Designed to provide exceptional flexibility along with advanced noise reduction acoustic technology, our movable walls are the perfect solution for dynamic spaces.

Manufactured in India, our walls adhere to international quality standards, ensuring top-tier craftsmanship and durability without compromising on excellence. Combining innovation, quality, and meticulous craftsmanship, our products offer the perfect balance of privacy and open space flexibility.

At Majestic Movable Wall, we are committed to the highest quality standards while proudly supporting the "Made in India" initiative.

Discover how our noise-reducing movable walls can transform your space, providing seamless, versatile solutions for a noise-free environment.

Why Choose Us

Quality Assurance

We maintain International standards of Quality and Service to ensure customer satisfaction.

Custom Solutions

We tailor our services to meet the specific needs of your project or business, offering flexible options and superior noise reduction acoustic technology walls.

Fast & Efficient

We prioritize fast processing and on-time deliveries, and our team ensures that all deliveries are made on schedule, with focus on Service and Quality.

ACOUSTIC MOVABLE WALLS

This movable wall system features panels made from wood or glass, suspended on ceiling-mounted rails with rollers, allowing for bi-directional movement. It can be operated manually or with a specialized mechanism.

Majestic Acoustic 100

Air Gap Sound Insulation Rw : STC up to 53dB
Thickness : 100 mm
Panel width : 1000 - 1219 mm
Height : max. 10000 mm

Material Solution:

Track : Aluminium (one-point / two-point) will be installed according to your site preference.

Frame : Combined Aluminium + Steel Finish

surface : MDF, Glass, Laminate, Fabric, Acoustic Panels and etc.

Majestic Acoustic 85

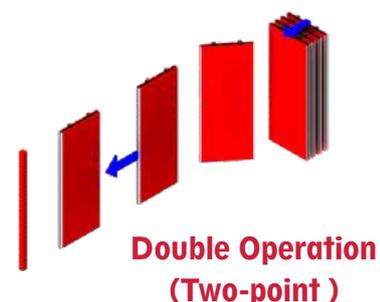

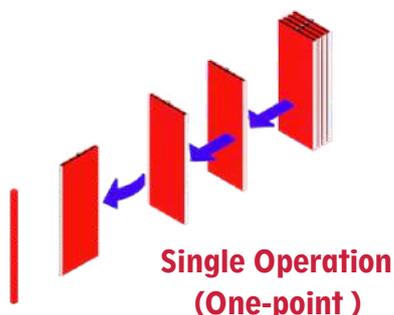

Air Gap Sound Insulation Rw : STC up to 47dB
Thickness : 85 mm
Panel width : 1000 - 1219 mm
Height : max. 5500 mm

Material Solution :

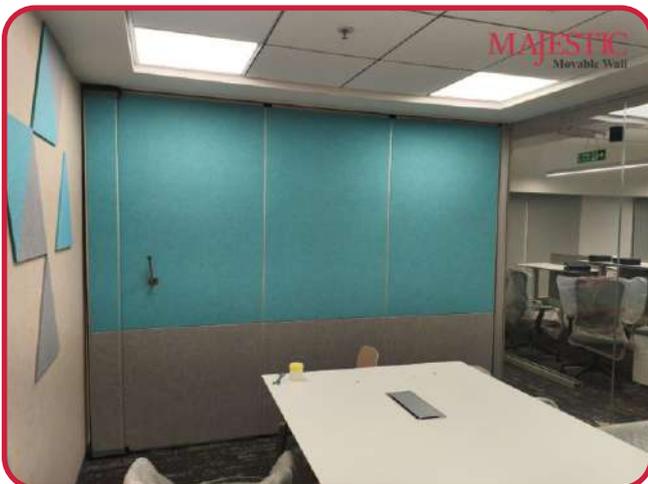

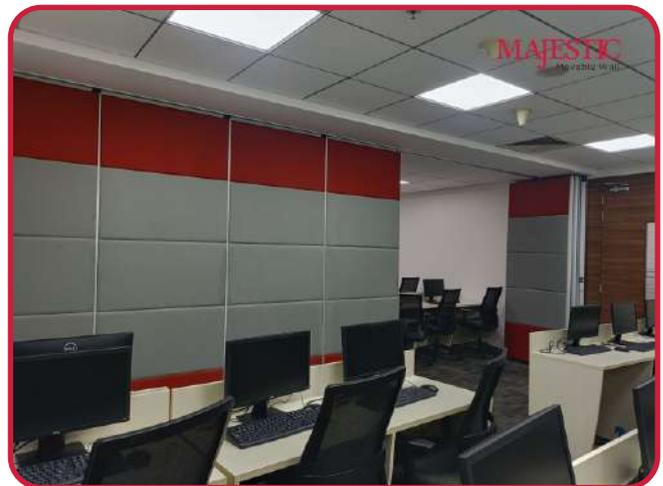

Track : Aluminium (one-point / two-point) will be installed according to your site preference.

Frame : Combined Aluminium + Steel Finish

surface : MDF, Laminate, Fabric, Acoustic Panels and etc.

MAJESTIC

TECHNICAL SPECIFICATION

ACOUSTIC RATING :

Available acoustic ratings are STC 45db, 48db and STC up to 53db.

PANELS CONSTRUCTION :

The system consists of **base panels, telescopic panels, sliding panels with an pass door leaf**, and alternative multiple parking options.

The thickness of the panels is determined by the required sound insulation value.

Each panel, whether equipped with a single or double roller, is suspended from a heavy-duty aluminum top track made of **6063 T6** grade aluminum.

The rollers are connected to the panel for smooth operation.

Rubber-based retractable seals are used at the top and bottom of the panel for improved sound insulation.

The panels' edges are protected by full-height aluminum trims made of 6063 T6 grade extruded aluminum, featuring male/female and retractable profiles.

For closing the wall, telescopic adjusting panels are used at the end. The extension section on one side of the panel contains an internal telescopic mechanism.

This mechanism operates with a rotating gear, controlled by a lever closer with a handle, and offers a maximum stroke of 149mm.

Panels Specifications :

Majestic Acoustic 100

Available acoustic ratings are STC 48db and STC up to 53db.

The **100mm** thick panels are built around either an aluminum or mild steel frame, with **18mm** MDF boards mounted on both sides.

Insulation consists of 50mm thick Rockwool with a density of 96kg/m³, 120kg/m³, 144kg/m³ and Acoustic mat placed between the two 18mm MDF boards and the specific insulation configuration is chosen based on the required acoustic rating.

The maximum width of a panel can be up to 1800mm, with a standard recommended maximum width of **1000mm to 1219mm.**

Aluminum nose and counter profiles ensure a tight seal between panels, aided by a gasket that provides 60N pressure per meter.

The maximum height for the panel is **10000mm.**

Each panel weighs between **48-50kg** per square meter.

Surface - MDF, Glass, Laminated, Fabric, Acoustic Panels and Etc.

Majestic Acoustic Glass100

Air Gap Sound Insulation Rw : STC up to 40dB

Thickness : 100 mm

Combination : 6mm + 6mm Glass

Panel width : 1000 - 1220 mm

Air Gap Sound Insulation Rw : STC up to 45dB

Thickness : 100 mm

Combination : 8mm + 8mm Glass

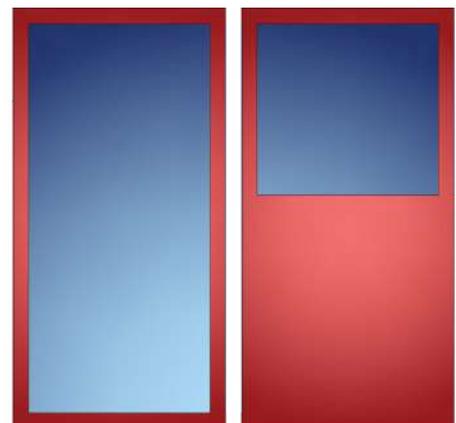

Panel width : 1000 - 1220 mm

Air Gap Sound Insulation Rw : STC up to 50dB

Thickness : 100 mm

Combination : 10mm + 10mm Glass

Panel width : 1000 - 1220 mm
